

# **TEST EXECUTION REPORT**

## **Partner Signup Automation – CloudAPP Authorized Partner Portal**

### **1. Executive Summary**

<b>Project</b>	<b>CloudAPP Authorized Partner Portal</b>
<b>Date of Execution</b>	February 11, 2026
Vrit Tech	QA Automation Team
<b>Total Test Cases</b>	2
<b>Pass Count</b>	2
<b>Fail Count</b>	0

Overall Success Rate: 100%

## 2. System Under Test (SUT)

Application URL	<a href="https://authorized-partner.vercel.app/">https://authorized-partner.vercel.app/</a>
Environment	Production-Staging
Browser	Google Chrome (v144.0.7559.133)
Automation Stack	Java 25, Selenium 4.38.0, TestNG 7.11.0, Mailosaur
Crafting Tool	Maven
Version Control	Git and Github

### 3. Test Case Breakdown

Test Case ID	Objective	Inputs	Expected Result	Actual Result	Status
TC_001	Validate OTP authentication flow	Registration credentials + Mailosaur API	User progresses after valid OTP	OTP 423609 validated successfully	PASSED
TC_002	Validate Partner Professional Details (Phase 3)	Experience: 2 years, Students: 50, Focus: International Recruitment	Form submits successfully	Form submitted without errors	PASSED

## 4. Technical Findings & Logs

**Synchronization:** WebDriverWait successfully handled page transition lag after OTP submission.

**Element Locators:** Dynamic IDs (e.g., radix-r7t) avoided using stable role and name attributes.

### *Console Log Snippet:*

---

Feb 11, 2026 6:05:33 PM – OTP 423609 entered successfully.

Feb 11, 2026 6:05:40 PM – Signup Phase 3 form submitted.

## 5. Conclusion & Recommendation

-The automation suite confirms that the multi-step signup flow is stable. The script effectively handles asynchronous elements and third-party OTP integrations.

Recommendation: Proceed with deployment to the CI/CD pipeline.
